

I CLAIM:

1. An adjustable book holder comprising:
a first frame,
a second frame, and
5 at least one auxiliary frame selectively secured between said first and said second frames.

2. The adjustable book holder as claimed in claim 1, wherein said first frame includes at least one aperture formed therein, said at least one auxiliary frame includes at least one peg extended
10 therefrom to selectively engage into said at least one aperture of said first frame, to secure said first frame and said at least one auxiliary frame together.

3. The adjustable book holder as claimed in claim 1, wherein said at least one auxiliary frame includes at least one aperture
15 formed therein, said second frame includes at least one peg extended therefrom to selectively engage into said at least one aperture of said at least one auxiliary frame, to secure said second frame and said at least one auxiliary frame together.

4. The adjustable book holder as claimed in claim 1, wherein
20 said first frame includes an upper beam and a lower beam each having a plurality of orifices formed therein, for rotatably receiving axles of sheet members.

5. The adjustable book holder as claimed in claim 1, wherein said second frame includes an upper beam and a lower beam each
25 having a plurality of orifices formed therein, for rotatably receiving axles of sheet members.

6. The adjustable book holder as claimed in claim 1, wherein

said at least one auxiliary frame includes an upper beam and a lower beam each having a plurality of orifices formed therein, for rotatably receiving axles of sheet members.

7. The adjustable book holder as claimed in claim 1 further
5 comprising a first and a second followers attached to said first and said second frames respectively.

8. The adjustable book holder as claimed in claim 7, wherein each of said first and said second frames includes a cavity formed therein, each of said first and said second followers includes a catch
10 extended therefrom and engaged into said cavities of said first and said second frames, to secure said first and said second followers to said first and said second frames respectively.

9. The adjustable book holder as claimed in claim 7, wherein said first follower includes at least one aperture formed therein, said
15 at least one auxiliary frame includes at least one peg extended therefrom to selectively engage into said at least one aperture of said first follower, to secure said first follower and said at least one auxiliary frame together.

10. The adjustable book holder as claimed in claim 7, wherein
20 said at least one auxiliary frame includes at least one aperture formed therein, said second follower includes at least one peg extended therefrom to selectively engage into said at least one aperture of said at least one auxiliary frame, to secure said second follower and said at least one auxiliary frame together.

25 11. The adjustable book holder as claimed in claim 7 further comprising a first and a second seats secured to said first and said second followers respectively.

12. The adjustable book holder as claimed in claim 11 further comprising means for adjustably securing said first and said second followers to said first and said second seats respectively at selected angular positions.

5 13. The adjustable book holder as claimed in claim 12, wherein said adjustably securing means includes a first gear attached to said first seat, and a second gear attached to said first follower and engageable with said first gear, to secure said first follower and said first seat together at selected angular positions.

10 14. The adjustable book holder as claimed in claim 12, wherein said adjustably securing means includes a first gear attached to said second seat, and a second gear attached to said second follower and engageable with said first gear, to secure said second follower and said second seat together at selected angular positions.

15 15. An adjustable book holder comprising:
a first frame,
a second frame,
at least one seat, and
means for adjustably securing said first and said second frames
20 to said at least one seat.

16. The adjustable book holder as claimed in claim 15 further comprising at least one follower secured between said first frame and said at least one seat.

25 17. The adjustable book holder as claimed in claim 16, wherein said at least one seat and said at least one follower each includes a gear engageable with each other, to secure said at least one seat and said at least one follower together at selected angular positions.
